

# Sports Betting with Data Science

By Justin Tunley

# Problem Statement and Opportunity

Mobile sports betting generated \$165.6m in New York in September 2023 (iGB)

73.5 million American adults have bet on NFL football this season (AGA)

How to we predict the outcome of NFL games?

1. **Primary audience:** Online Sportsbooks (FanDuel, Caesars, DraftKings, BetMGM)
2. **Secondary audience:** at-home bettors searching for advantageous odds

# Methodology

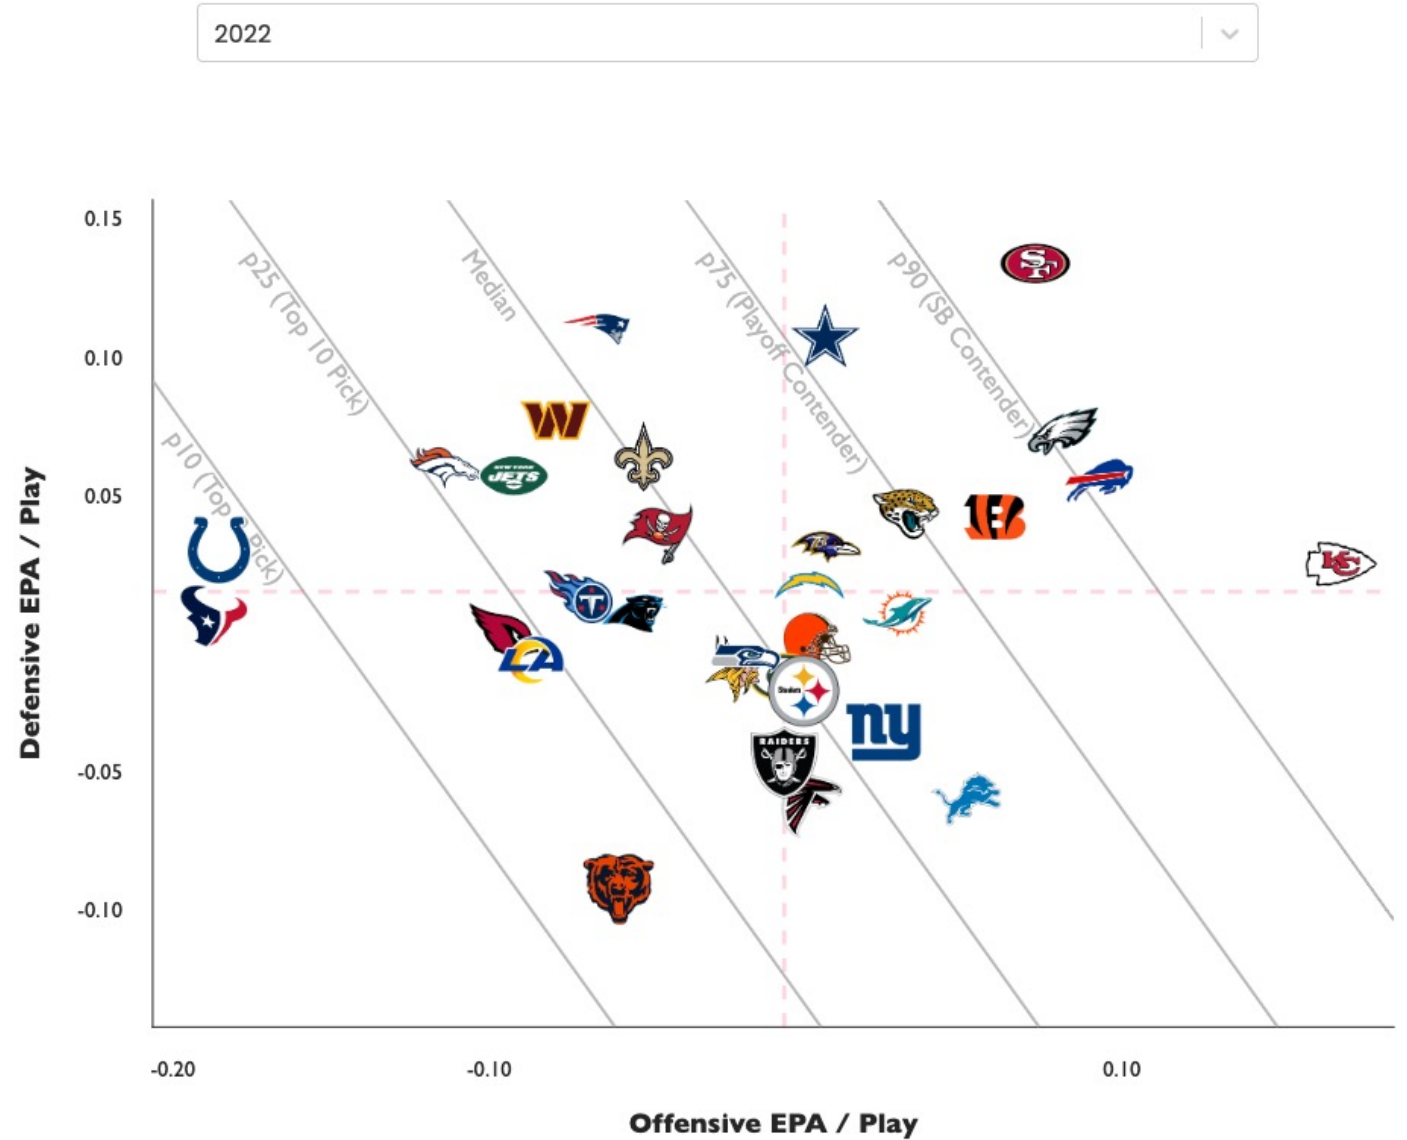

2 Regression Models:

- Home Offense vs Away Defense
- Away Offense vs Home Defense

Target variable: Expected Points

Scaling Data Sets

- In-season data: Bye Weeks
- Historical data: Games

# Impact

Help people make informed decisions on 3 key outputs:

1. Moneyline
  - Who is going to win?
2. Spread
  - How much will the better team win by?
3. Point Total
  - How many points will the teams score combined?

Sports Books set the line as close to even as possible to ensure profits.

Bettors can compare their lines with those from the books to find profitable bets.

Today	Spread	Total	Moneyline
 <b>JAX JAGUARS</b>	+2.5 -108	O 41 -110	+120
 <b>NO SAINTS</b>	-2.5 -112	U 41 -110	-142
<b>SGP</b> Today 8:18 PM			
Sun Oct 22nd	Spread	Total	Moneyline
 <b>BUF BILLS</b>	-9 -110	O 40 -110	-440
 <b>NE PATRIOTS</b>	+9 -110	U 40 -110	+340

# Introducing the Data Sets

## Offensive Metrics:

- Points per game, rushing yards per game, passing yards per game.
- Formations and tendencies
  - How many wide receivers are on the field? Do they use more than one TE?
- Play call breakdown:
  - How many pass plays vs run plays?
- Penalties per game and penalty yards per game
- Depth-of-target
  - Are they taking risks throwing down-field or

# Introducing the Data Sets

## Defensive Metrics:

- Tracking how teams playing against them perform in the same metrics
- Defensive tendencies and formations
  - Do they prefer a 4-3, 3-4, dime or nickel formations?
  - Do they run a zone or man defense?
  - How quickly do they pressure the opposing QB?

# Next steps

1. Keeping up-to-date data sets
  1. Option 1: Scraping from [ESPN](#)
  2. Option 2: Sportsbetting api
2. Adding features to team offense
  - Redzone conversion rate
  - Turnovers
3. Player bonuses:
  - The Tom Brady Effect
4. Combining team offense and team defense in a single regression.
5. Special Teams (kick / punt returns) metrics
  - In 2007, Devin Hester broke the record for kick returns in a season with 6. That's 36 points not currently being counted for the Bears in 2007
